

In the Matter of )  
 )  
Connect America Fund ) WC Docket No. 10-90  
 )

South Slope Cooperative Telephone Company (“South Slope”) respectfully submits the following comments to the Federal Communications Commission (“FCC”) in response to the Wireline Competition Bureau’s (Bureau) publication of the list of all census blocks that price cap carriers have requested funding to serve as part of the second round of Connect America Phase I (“Public Notice”).<sup>1</sup>

<sup>1</sup> Wireline Competition Bureau Publishes Census Blocks, And Commences Challenge Process, For Second Round Of Connect America Phase I, WC Docket No. 10-90, Public Notice, DA 13-1832 (rel. August 28, 2013).

areas and currently serves these areas with speeds that meet or exceed 4 Mbps downstream and 1 Mbps upstream.

South Slope has been providing voice and data services to the entire Oxford, Iowa Exchange, which includes these census blocks, since 1999. Windstream, the ILEC provider in the census blocks listed within Appendix A, has not made any improvements to their Internet service to these census blocks in over ten years. Thus, South Slope overbuilt the Oxford Exchange with RUS loan financing and currently provides high speed broadband services within all areas of the Oxford Exchange. Therefore, the attached Appendix A provides the most current broadband service data regarding the blocks on Appendix A. Also included with this filing as documented evidence for South Slope's service in the respective census blocks, is an Affidavit from Justyn Miller, Chief Executive Officer of South Slope, as well as a screen print from South Slope's website outlining the available speeds, attached hereto as Appendix B. Also attached as Appendix C are redacted customer bills showing South Slope is capable of providing broadband services that meet or exceed 4 Mbps downstream and 1 Mbps to addresses within the census blocks in question.

South Slope's FTTL broadband platform within the Oxford, Iowa Exchange is capable of delivering bandwidth that meets or exceeds 4 Mbps downstream and 1 Mbps upstream, to each anchor institution, business and residential location constructed within the census blocks listed on Appendix A.

South Slope appreciates the opportunity to file these comments relating to areas shown as eligible census blocks that price cap carriers have requested funding to serve as part of the second round of Connect America Phase I. In conclusion, South Slope requests the census

blocks listed on Appendix A all within the Oxford, Iowa Exchange be deemed as served for the reasons stated herein and be removed from the list of areas eligible for Phase I support going forward.

Respectfully submitted,

By: /s/ Justyn Miller
